The following information is included to inform and assist the Permit Holder in achieving compliance with applicable provisions of Federal, State, and District Rules and Regulations. The following set of referenced regulations are not intended to be either comprehensive or exclusive, nor are they intended to be emission limiting permit conditions, but they are still applicable rules of the District. Occasionally laws are amended. The amended versions of the referenced rules shall be deemed to be in effect. **It is the Permit Holder's responsibility to comply with all applicable Rules and Regulations.** Within 10 days of receiving a complaint or other legal process initiating a challenge to this Authority to Construct, or subsequent Permit to Operate, the District shall notify the applicant or Permit Holder in writing. The applicant or Permit Holder may, within 30 days of posting of the notice, request the revocation of the permit or cancellation of the application. An applicant or Permit Holder not requesting revocation or cancellation within 30 days of receipt of notice from the District shall hold harmless and defend the District, its Board members, Hearing Board members, APCO, officers, agents, employees, and representatives from liability for any award, damages, costs, and fees incurred by the District and/or awarded to any plaintiff in any action challenging the validity of this permit or any environmental or other documentation related to approval of this permit, excepting only loss, injury or damage caused by the negligence or willful misconduct of the District.

1. The Permit Holder shall submit the Permit Notification Card after completing construction, installation, initial adjustment, or shakedown, and no later than 48 hours after beginning actual operation of the equipment listed in the Authority to Construct (ATC). For modifications of existing permits not requiring a physical change, the Permit Holder shall submit the Permit Notification Card no later than 48 hours after beginning operation of the equipment under the revised conditions of this ATC. The Permit Notification Card serves as the Permit to Operate (PTO) application, while the ATC and its conditions shall function as a temporary PTO until the final PTO is issued or denied. Operation beyond the shakedown period and the allowable 48 hours of actual operation without the submission of a Permit Notification Card will be considered operation without a valid permit and may be subject to enforcement action. [District Rule 3.1, §402]
2. The District requires an inspection of the equipment after completion of the construction and prior to the issuance of the Permit to Operate. [District Rule 3.1, §402]
3. An authorization to construct shall remain in effect only until the application for Permit to Operate is granted or denied; however, such an authorization shall not remain in effect beyond two years from the date of issuance unless the District finds that the time required for construction requires an extension and grants one or more extensions, for a total time not to exceed five years from the date of issuance. [District Rule 3.1, §407]

The following set of conditions are established by the District to provide enforceable operating parameters as authorized by California Health and Safety Code Section 42301 and District Rule 3.1, Section 402. If any of the rules and regulations referenced below are amended subsequent to the issuance date of this permit, resulting in the amended rule differing from or superseding the corresponding condition, then the Permit Holder shall be required to comply with the amended rule or regulation and shall no longer be required to comply with the superseded condition.

4. The Permit Holder shall not discharge into the atmosphere any air contaminant for a period or periods aggregating more than 3 minutes in any one hour which is:
  - a. As dark or darker in shade than No. 1 on the Ringelmann Chart; or
  - b. Greater than 20% opacity. [District Rule 2.3 and District Rule 3.4]
5. Emission rates shall not exceed the following:
  - a. VOC (measured as methane) - 3 ppmv @ 15% O<sub>2</sub>;
  - b. CO - 239 ppmv @ 15% O<sub>2</sub>; and
  - c. NO<sub>x</sub> (as NO<sub>2</sub>) - 20 ppmv @ 15% O<sub>2</sub>. [District Rule 3.4]
6. A non-resettable, totalizing fuel flow meter shall be installed and utilized to measure the quantity of propane combusted in the engine. [District Rule 2.32, §304.1]
7. The Permit Holder shall install and maintain such facilities as are necessary for sampling and testing purposes. The number, size, and location of sampling ports shall be in accordance with Air Resources Board Test Method 1. The location and access to the sampling platform shall be in accordance with the General Industry Safety Orders of the State of California. [District Rule 3.4]
8. The Permit Holder shall perform source test within 45 days of initial operation and at least once every 12 months to demonstrate compliance with VOC, CO and NO<sub>x</sub> emission limits. [District Rule 2.32, §303.2 and District Rule 3.4]
9. Source testing shall be conducted using the following test methods:
  - a. VOC - EPA Method 18;
  - b. CO - EPA Method 10, or CARB Method 100;
  - c. NO<sub>x</sub> (as NO<sub>2</sub>) - EPA Method 7E, or CARB Method 100; and
  - d. Stack gas oxygen - EPA Method 3A, or CARB Method 100. [District Rule 2.32, §502 and District Rule 3.4]
10. The District must be notified prior to any emissions testing event (source test or screening analysis), and a protocol must be submitted for approval 14 days prior to testing. The results of an emissions testing event shall be submitted to the District within 60 days of the test date. The protocol and report shall be mailed to the attention of the Supervising Air Quality Engineer. [District Rule 3.4]
11. The Permit Holder shall monitor and record the cumulative quarterly and annual propane fuel usage from the totalizing meter. The records shall be updated quarterly and made available to the District upon request. [District Rule 2.32, §501]

12. The Permit Holder shall maintain records of:
  - a. Maintenance for the engine and control device according to the manufacturer's emission related instructions;
  - b. Notifications submitted to comply with 40 CFR Parts 60.4243 and 60.4245; and
  - c. Documentation from the manufacturer that the engine is certified to meet the applicable emission standards. [40 CFR Parts 60.4243 and 60.4245]
13. The air to fuel ratio controller must be maintained and operated appropriately to ensure proper operation of the engine and control device. [40 CFR Part 60.4243(g)]
14. The Permit Holder shall maintain all records on site for a period of five (5) years from the date of entry and these records shall be made readily available to District personnel upon request. [District Rule 3.8, §302.6(b)]

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26, Part 4, Chapter 3, of the Health & Safety Codes of the State of California or the Rules and Regulations of the Yolo-Solano Air Quality Management District.

Mat Ehrhardt, P.E.  
AIR POLLUTION CONTROL OFFICER
